

## Michael Smith Architects

**F**ounded in 1999 by principal Michael Smith, the firm's underlying design philosophy centers on the idea that carefully applying the design principles of simplicity, consistency, and authenticity will yield a timeless work of architecture regardless of the style or type of building.

Michael and his team have designed a wide range of high-quality projects, including large single-family custom residences, residential renovations, boutique commercial projects, educational facilities, and multi-family

residential projects. Michael Smith Architects (MSA) has more than 17 years of experience in a diverse range of projects in Fairfield County and the New York City metropolitan area.

"At MSA we believe that every project deserves its own unique solution that represents a combination of thoughtful design and an understanding of the client's priorities. We work to create custom solutions that respond to the client's wishes, the environment, and the historical context of the project," Michael says. Further, MSA takes a holistic approach

to the design process by considering not just the exterior architecture, but also the design of the interior trim, finishes, and cabinetry to create a consistent overall aesthetic that will stand the test of time.

Through its membership in the United States Green Building Council, MSA strives to incorporate many sustainable or green features into its projects wherever possible, and takes great care to integrate these new technologies into each design in a seamless and harmonious way.
